

ACG SECURITY

Integrated Security Technology Platform

SOFTWARE DEVELOPMENT, LICENSING & MANAGED TECHNOLOGY
SERVICES AGREEMENT

This Agreement establishes the contractual framework for the design, development, configuration, deployment, support and optional operation of the ACG Security digital security platform. Features are selected by the Client in the Feature Selection Schedule and only selected features form part of the contracted scope.

Commercial status: This Agreement becomes binding when signed by authorised representatives of both parties. The selected features, pricing, term and service level must be completed before signature.

1.1 Purpose. 4DS Solutions will provide ACG Security with a configurable digital security technology platform connecting clients, the control room, field officers, technicians, supervisors and, where selected, medical/ambulance operations. The platform is based on the 4DS Nexus technology stack with role-specific portals and a central API/data layer.

1.2 Contract principle. The platform is modular. ACG Security is not required to purchase every feature. The Owner or authorised Client representative must select either **ALL FEATURES** or individual modules in Schedule 22. Only selected features, together with the applicable commercial option, form part of the contracted scope.

1.3 Definitions.

“Platform” means the ACG Security implementation of the 4DS Nexus technology stack.

“Feature Schedule” means Schedule 22.

“Client” means ACG Security.

“Provider” means 4DS Solutions (Pty) Ltd.

“Go-Live” means the date on which the agreed production scope is made available for operational use.

“Change Request” means a written request for work outside the selected scope.

1.4 Precedence. If there is a conflict, the signed Feature Schedule and Commercial Schedule prevail over general descriptions, demonstrations, mock-ups or earlier discussions to the extent of the conflict.

PARTY	DETAILS
Provider	4DS Solutions (Pty) Ltd — K2025567725 — South Africa
Client	ACG Security — Legal name: _____
Client registration	_____
Client address	_____
Authorised representative	Name: _____ Title: _____

2.1 Appointment. The Client appoints the Provider to perform the selected services and deliver the selected platform modules, and the Provider accepts that appointment subject to this Agreement.

2.2 No implied scope. A feature appearing in a demonstration, roadmap, technical inventory or discussion is not automatically included unless selected in Schedule 22 or expressly included in a signed Change Request.

2.3 Client authority. The person signing for ACG Security warrants that they are authorised to bind the Client or have obtained the necessary internal approval.

3.1 Owner choice. Before implementation, the Owner/authorised representative must complete Schedule 22 by selecting **ALL FEATURES**, **CUSTOM SELECTION** or **PHASED SELECTION**. Where ALL FEATURES is selected, all modules listed in Schedule 22 are included, subject to exclusions, dependencies, third-party costs and agreed commercial limits.

3.2 Individual selection. If ALL FEATURES is not selected, every required module must be ticked. Unticked modules are expressly excluded from the initial scope and may be added later through a Change Request, revised quotation or written addendum.

3.3 Dependencies. Some features depend on third-party APIs, devices, CCTV systems, alarm panels, mapping services, payment services, mobile operating systems, app-store approvals or other infrastructure. Integration remains subject to credentials, technical compatibility, approvals, usage charges and provider availability.

3.4 Commercial logic. The price schedule is intentionally modular. ACG may purchase only the components required. The individual reference prices provide a transparent value breakdown; the **ALL FEATURES** package receives a separate strategic bundle price.

SELECTION	MEANING
☐ ALL FEATURES	All modules in Schedule 22 are selected, subject to exclusions/dependencies and the agreed bundle price.
☐ CUSTOM SELECTION	Only individually ticked modules are selected and priced.
☐ PHASED SELECTION	Selected modules may be delivered in agreed implementation phases.

Selected scope reference: Schedule 22 must be signed/initialled by both parties. ACG Security may not rely on an unticked feature as part of the contracted deliverable.

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Dashboard & protection status	Dashboard, notifications and Light/Dark/System theme
☐	Panic & emergency	Panic, Silent Panic, Medical Emergency, Fire Emergency and Emergency Hub
☐	Emergency contacts & calls	Emergency contacts, control-room calling and in-app/emergency calling
☐	Incidents & evidence	Incident history, evidence vault and incident-linked media
☐	Family Safety	Family Chat, Safe Zones, Family Tracking and family member messaging
☐	Vehicle Security	Phone tracking, theft recovery, geofence zones and theft reporting
☐	Home Security	Property registration, Away/Stay/Night/Disarm, sensors, Home Panic and camera access
☐	Personal Security	Location, emergency and security update cards
☐	Subscription & billing	Subscriptions, billing, documents, upgrades, debit-order workflow and receipts
☐	Client profile	GPS permissions, medical profile and contacts

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Ops Board	Operational dashboard, incident queue and KPIs
☐	Live Map	Clients, officers, fleet, client vehicles, incidents, properties and trails
☐	CCTV / Surveillance	Sites, dashcams, triggers, acknowledge, dispatch, false alarm and resolve
☐	Incidents	Reporting, dispatch, maps, documents, reports and resolution
☐	Dispatch	Auto-assign/reassign, nearest available, emergency notify all and officer roster
☐	Customers / CRM	Customer profiles, subscriptions, loyalty, discounts, invitations and billing
☐	Fleet	Units, call signs, vehicles, crew, operations teams and maintenance status
☐	Officers	Profiles, rank, zone, status, map, dispatch and calls
☐	Documents	Folders, uploads, incident links, pin/unpin and deletion
☐	Communications	Client chat, directory, call history, attachments, audio/video/phone
☐	Teams & Users	Branches, teams, user creation and access management
☐	Analytics	Incidents, officers, live map and operational statistics
☐	Settings & Audit	Permissions, alerts/escalation, security, billing, integrations and audit logs
☐	Sales / Store / Install Jobs	Optional sales, store, installation and job management workflows
☐	Developer desk	Optional developer role, error tickets and support workflow

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Officer dashboard	Emergency banner, dispatch chat and operational status
☐	Jobs queue	Accept / En route / On scene / Complete
☐	Officer SOS	Check-ins, request backup, need medic and call supervisor
☐	Live map & navigation	Live map and navigation
☐	Evidence	Record video, photos, live camera and save to dispatch
☐	Incident reports	Assignment reports and new field incidents
☐	Calls	Dispatch, internal, WhatsApp and phone calling
☐	Crew chat	Dispatch/team chat, attachments, emoji, audio, video and phone
☐	Officer profile	Rank, status and theme

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Today's jobs	Job queue, due-soon filters and job board
☐	Installation workflow	Accept → Navigate → Site check → Install → Test → Signature → Complete
☐	Checklist & equipment	Equipment confirmation and serial capture
☐	QR / equipment status	QR scan, mark installed and defective equipment
☐	Photos	Take, upload, retake and delete
☐	Customer communication	Call, WhatsApp and navigation
☐	Control room	Call, chat, issue reporting, resolve and escalate
☐	Team & inventory	Team chat, parts/inventory and stock requests
☐	Camera commissioning	Property, name, location, channel and placement
☐	Technician profile	Job access and team access

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Supervisor dashboard	KPIs — On duty / On scene / Available / Need attention
☐	Officer map	Full operational map
☐	Shifts / roster	Shift and roster visibility
☐	Patrol	Checkpoint logging
☐	Performance	Officer performance dashboard
☐	Supervisor support	Support chat and calls
☐	Manager operations	Operational management
☐	Branches / teams / staff	Branch, team and staff management
☐	Role administration	Role and permission administration
☐	Finance visibility	Finance/billing visibility where authorised

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Medical queue	Ambulance request intake
☐	Medical dispatcher	Dispatcher dashboard
☐	Crew board	Crew board
☐	Operations map	Medical operations map
☐	Medical crew profile	Crew profile
☐	Medical status workflow	ACCEPTED → EN_ROUTE → ARRIVED → TRANSPORT → HOSPITAL → HANDOVER
☐	Unit allocation	Recommend unit / allocate crew
☐	Client medical profile	Blood, allergies, medications, conditions and instructions
☐	Medical / fire emergency	Requests from client portal

Select only the capabilities ACG Security requires. The final selections are priced through the Commercial Schedule and Feature Selection & Commercial Sign-Off. Unticked items are excluded unless later added by written Change Request.

OPTION	CAPABILITY	DESCRIPTION
☐	Internal calls	Internal calls / dispatch line
☐	Phone calling	Phone calling
☐	WhatsApp	WhatsApp communication
☐	In-app calling	Audio / video calling
☐	Chat	Attachments, emoji and internal communications
☐	Google Maps	Navigation and location services
☐	CCTV	Site feeds, dashcams and event triggers
☐	Push notifications	Application notifications
☐	Email	Email notifications
☐	SMS	SMS / messaging provider
☐	Payments	Payment gateway / subscription billing
☐	Debit orders	Debit-order workflow
☐	Alarm / sensor / access control	Third-party security device integrations
☐	App stores	App Store / Google Play deployment
☐	Other integration	Other: _____

The Platform uses role-based access. The Owner may select the roles required for ACG Security. Access should be limited to each employee's operational responsibility.

SELECT	ROLE	INDICATIVE ACCESS
☐	USER / CLIENT	Client portal, panic, home, vehicles, family, billing
☐	FAMILY MEMBER	Limited family tracking / chat
☐	OFFICER	Jobs, evidence, reports, SOS
☐	TECHNICIAN	Install jobs, cameras, stock
☐	DISPATCHER	Map, CCTV, incidents, dispatch, communications
☐	SUPERVISOR	Roster, patrol, performance
☐	MANAGER	Operations plus permitted store/installation functions
☐	TENANT ADMIN	Staff, clients, finance
☐	OWNER	Full business/platform access subject to restricted developer-only functions
☐	SUPER ADMIN	Platform-wide administration
☐	SALES	Customers, leads, installs, chat
☐	DEVELOPER	Error tickets and support
☐	MEDICAL DISPATCHER / CREW	Ambulance queue / crew workflow

Audit. Administrative activity, access, incident actions and other agreed system events may be recorded in audit logs. Permissions can be controlled at module and action level.

12.1 Phased delivery. Implementation may be performed through discovery, UI/UX and platform configuration, CRM/control-room configuration, field applications, integrations, testing, deployment and training.

PHASE	DELIVERY
1. Discovery	Scope confirmation, technical planning, accounts, data and feature selection
2. Platform foundation	Core platform, authentication, roles and agreed portals
3. Operations	Control room, incidents, dispatch, CRM, officers, fleet and selected modules
4. Field applications	Officer / technician / supervisor / medical modules selected in Schedule 22
5. Integrations	Selected maps, CCTV, communications, payments and third-party integrations
6. QA & launch	Testing, defect correction, deployment, training and agreed go-live
7. Managed service	Support, monitoring and improvements where the managed option is selected

12.2 Acceptance. A feature is accepted when it materially performs the agreed acceptance criteria in the Feature Schedule, subject to documented defects that do not prevent reasonable operational use. Minor defects may be corrected during the agreed support period.

12.3 Client dependencies. ACG Security must provide timely approvals, access, data, credentials, device information and third-party cooperation reasonably required for delivery. Delays caused by missing Client inputs may move the implementation schedule.

If a managed-service option is selected, the monthly fee is a technology management service rather than hosting alone. The selected service areas below define what the recurring fee covers.

SELECT	SERVICE AREA	INCLUDED ONLY IF SELECTED
☐	Platform management	Monitoring, configuration and operational care
☐	Application maintenance	Bug fixes, compatibility maintenance and routine updates
☐	Security / monitoring	Monitoring, security updates and agreed alerting
☐	Technical support	Operational support and troubleshooting
☐	Continuous development	Only within an expressly agreed development allocation; not unlimited
☐	Governance / reporting	Service reporting, review meetings and roadmap management
☐	Catalogue / data administration	Only where expressly allowed in the Commercial Schedule
☐	SLA	Response / resolution targets set out in the signed SLA schedule

Important: Managed service does not mean unlimited development. Major new modules, material integrations and major workflow changes are separately scoped unless expressly allocated.

14.1 Commercial model. ACG Security may choose a once-off ownership-oriented implementation, a managed technology model, or a hybrid/custom arrangement. The pricing below is inserted as a proposed commercial schedule for negotiation and final signature.

OPTION	COMMERCIAL STRUCTURE	PROPOSED ACG PRICE
A — Ownership	Once-off strategic implementation / ownership-oriented delivery. Future major modules and material changes quoted separately.	R195,000 once-off
B — Managed	R75,000 implementation/upfront + recurring managed technology service.	R75,000 upfront + R45,000/month
C — Hybrid / Custom	Selected modules plus custom managed services; priced from the module schedule and agreed service allocation.	To be agreed

14.2 Transparent value breakdown — full platform reference value

SELECT	MODULE / WORKSTREAM	REFERENCE VALUE
☐	Core Platform & Architecture	R55,000
☐	Client Protection Portal	R45,000
☐	Control Room & Operations	R65,000
☐	Officer Field Application	R35,000
☐	Technician Application	R30,000
☐	Supervisor & Management	R20,000
☐	Medical / Ambulance Module	R25,000
☐	CCTV, Maps, Communications & Integrations	R45,000
☐	Roles, Security & Audit	R20,000
☐	QA, Deployment, Training & Launch	R25,000
	REFERENCE VALUE — FULL PLATFORM	R365,000
	ACG STRATEGIC ALL-FEATURES PRICE	R195,000
	STRATEGIC VALUE / DISCOUNT	R170,000

Why the bundle price is lower: The individual reference values establish the commercial value of the underlying workstreams (R365,000). Where ACG selects the complete platform, 4DS applies a strategic bundled price of **R195,000**, representing a commercial benefit of **R170,000** against the reference value. This is a client-specific strategic price and should not be interpreted as 4DS standard market pricing.

14.3 Custom selection pricing. If CUSTOM SELECTION is chosen, the selected reference values are added together. The parties may then agree a project discount, payment schedule and/or managed-service component in the Commercial Schedule. ACG therefore pays only for the modules it chooses.

EXAMPLE SELECTION	MODULES SELECTED	REFERENCE TOTAL
Client + Control Room	R45,000 + R65,000	R110,000
Client + Control Room + Officer	R45,000 + R65,000 + R35,000	R145,000
Full security operations	Control Room + Officer + Technician + Supervisor	R150,000
Full platform	All listed modules	R365,000 reference → R195,000 strategic bundle

14.4 Managed model. The proposed managed structure is **R75,000 upfront + R45,000 per month**. The first-year cash value is **R615,000** (R75,000 upfront plus 12 × R45,000). The monthly service is for the selected managed-service areas and does not include unlimited new development.

COMMERCIAL FIELD	PROPOSED / AGREED
Implementation / upfront fee	R75,000 for Managed model
Monthly managed service	R45,000 / month
First-year cash value	R615,000
Annual escalation / review	_____ % / _____
Contract term	☐ 1 year ☐ 3 years ☐ 5 years ☐ 10-year framework ☐ Custom
Payment due	_____
Deposit / milestone schedule	_____

14.5 Payment default. Amounts not paid when due may result in suspension of non-critical services after written notice, subject to applicable law and any agreed cure period. Suspension does not waive amounts already due.

COST / ACCOUNT	COMMERCIAL TREATMENT
Hosting / cloud infrastructure	Client-paid or passed through at cost, as agreed
Domain / DNS	Client-owned and Client-paid
Apple Developer account	Client-owned; third-party fee paid by Client
Google Play Console	Client-owned; third-party fee paid by Client
Payment gateways	Provider transaction charges paid by Client
WhatsApp / SMS	Usage/provider fees paid by Client
Maps / location APIs	Usage fees where applicable
CCTV / alarm / hardware	Hardware, licences and provider charges unless expressly included
Professional legal / compliance services	Separate external cost unless expressly included

ACG Security should own its domain, business data, app-store accounts, payment accounts and critical third-party service accounts where practical so that it retains control of its digital assets.

16.1 Change requests. ACG Security may request new features, additional integrations, additional branches, additional users, material workflow changes, new applications or other work outside the selected scope.

16.2 Written approval. The Provider may provide a quotation or change order stating scope, price, dependencies, delivery impact and revised acceptance criteria. No material out-of-scope work is required to be performed until approved in writing.

16.3 Feature activation. A previously unticked feature can be activated through a signed addendum, change order or revised Feature Schedule. The Provider may charge an implementation fee, recurring fee or both.

16.4 Roadmap items. Future POS/WMS/advanced AI/advanced route optimisation or other roadmap functionality is not included merely because it appears in a roadmap. Future modules are separately scoped unless expressly selected and priced.

16.5 Commercial protection. Changes to price should correspond to changes in scope, term, payment commitment, service level and/or development commitment.

17.1 Provider technology. The Provider retains ownership of its pre-existing software frameworks, reusable components, development methodologies, templates, libraries, internal tooling and general-purpose technology unless expressly transferred in writing.

17.2 Client-specific deliverables. ACG Security receives the rights expressly granted in the final agreement for commissioned ACG-specific deliverables, subject to payment of all amounts due and any third-party/open-source licensing terms.

17.3 Client data. ACG Security retains ownership of its business and customer data. The Provider may process data to deliver, secure, support and maintain the contracted services.

17.4 Security. The Provider will apply agreed security controls appropriate to the contracted platform. No system can guarantee zero cyber risk, uninterrupted availability or prevention of every attack.

17.5 Privacy. The parties will cooperate on appropriate privacy/data-protection arrangements, including access controls, data handling, retention and incident procedures. Where required, the parties should obtain professional legal advice regarding POPIA and other applicable obligations.

17.6 Account ownership. Where practical, ACG Security should own its domain, business data, app-store accounts, payment accounts and critical third-party service accounts.

18.1 Confidential information. Each party shall keep confidential information received from the other party confidential and use it only for purposes connected with this Agreement.

18.2 Permitted disclosure. Disclosure may be made to employees, professional advisers, subcontractors or service providers who require the information and are bound by appropriate confidentiality obligations, or where disclosure is required by law.

18.3 Commercial confidentiality. Pricing, discounts, architecture, development methodology, scope, commercial concessions and other non-public commercial information shall be treated as confidential unless the parties agree otherwise in writing.

18.4 Security incidents. Each party shall notify the other within a reasonable period after becoming aware of a material security incident affecting the other party's confidential information or contracted platform, subject to lawful and operational constraints.

18.5 Survival. Confidentiality obligations survive termination for so long as the information remains confidential, subject to applicable law.

19.1 Professional performance. The Provider will perform the contracted services with reasonable skill and care.

19.2 No absolute guarantee. The Platform is a technology system and cannot guarantee that every incident will be detected, that every response will succeed, that a security event will be prevented, or that third-party services will always be available.

19.3 Client operational responsibility. ACG Security remains responsible for its physical security operations, officer conduct, licensing, dispatch decisions, emergency procedures, equipment maintenance and compliance obligations unless expressly transferred by written agreement.

19.4 Third parties. The Provider is not responsible for outages, policy changes, API changes, approval delays, pricing changes or failures of third-party providers outside its reasonable control.

19.5 Limitation. The parties should agree a reasonable cap on liability in the Commercial Schedule, with appropriate exclusions for matters that cannot lawfully be limited. Independent legal advice is recommended before final signature.

19.6 Insurance. Each party remains responsible for maintaining insurance appropriate to its business and contractual responsibilities, unless otherwise agreed.

TERM FIELD	AGREED
Commencement date	_____
Initial term	☐ 1 year ☐ 3 years ☐ 5 years ☐ 10-year framework ☐ Other
Renewal	_____
Notice period	_____ days
Annual review	☐ Yes ☐ No
Escalation	_____

20.1 Term. This Agreement begins on the Commencement Date and continues for the Initial Term unless terminated earlier under this Agreement.

20.2 Renewal. Renewal may be automatic or by written agreement as specified above.

20.3 Termination for breach. Either party may terminate for material breach that remains uncured after written notice and a reasonable cure period, subject to applicable law.

20.4 Non-payment. Persistent non-payment may result in suspension and/or termination after written notice and any agreed cure period.

20.5 Exit. On termination, the parties will cooperate on an orderly handover, subject to payment of outstanding amounts and the agreed data-export/handover scope. Provider reusable technology remains Provider property unless separately transferred.

21.1 Governing law. This Agreement is intended to be governed by the laws of the Republic of South Africa, subject to mandatory legal requirements applicable to the parties.

21.2 Good-faith resolution. The parties shall first attempt to resolve disputes through good-faith discussions between authorised representatives.

21.3 Escalation. If unresolved, the dispute may be escalated to mediation, arbitration or a competent court as the parties specify in writing.

21.4 Entire agreement. This Agreement and its signed schedules constitute the agreement between the parties concerning the selected services and supersede inconsistent prior scope discussions.

21.5 Amendments. Amendments must be in writing and approved by authorised representatives.

21.6 Assignment. Neither party may materially assign this Agreement without the other's written consent, except to a successor in connection with a bona fide restructuring or sale of substantially all relevant business assets, subject to applicable law.

21.7 Force majeure. Neither party is liable for delay caused by events beyond reasonable control, including infrastructure failure, widespread outages, natural disasters, labour disruptions, government action or third-party service failure.

21.8 Independent legal review. This document is a commercial technology agreement draft and should be reviewed and, where appropriate, amended by a South African attorney before execution.

INSTRUCTION TO OWNER: Select **ALL FEATURES** OR select the individual features required. If **ALL FEATURES** is selected, individual tick boxes may be left blank; **ALL FEATURES** controls. If **CUSTOM SELECTION** is selected, only ticked items are included. For **CUSTOM SELECTION**, the reference module prices in Section 14 are used to calculate the selected implementation value before any agreed discount.

Master choice

MASTER CHOICE	SELECT
ALL FEATURES — all modules in this Schedule	☐
CUSTOM SELECTION — only individually selected items	☐
PHASED — selected modules delivered in agreed phases	☐

Commercial selection

SELECT	COMMERCIAL OPTION	PRICE
☐	Ownership — full platform strategic bundle	R195,000 once-off
☐	Managed — implementation + managed service	R75,000 upfront + R45,000/month
☐	Hybrid / Custom	To be calculated from selected modules

Selected module checklist

SELECT	MODULE	REFERENCE VALUE
☐	Core Platform & Architecture	R55,000
☐	Client Protection Portal	R45,000
☐	Control Room & Operations	R65,000
☐	Officer Field Application	R35,000
☐	Technician Application	R30,000
☐	Supervisor & Management	R20,000
☐	Medical / Ambulance Module	R25,000
☐	CCTV, Maps, Communications & Integrations	R45,000
☐	Roles, Security & Audit	R20,000
☐	QA, Deployment, Training & Launch	R25,000
FULL PLATFORM REFERENCE VALUE		R365,000
ALL-FEATURES STRATEGIC PRICE		R195,000

For **CUSTOM SELECTION**: tick the required modules and write the selected amount below. The final signed amount overrides the reference values for the agreed project.

CUSTOM SELECTION CALCULATION	AMOUNT
Selected module reference subtotal	R _____
Agreed project / strategic discount	R _____
Agreed implementation price	R _____
Optional additional integration work	R _____
Optional training / onboarding	R _____
Optional managed service	R _____ / month
Third-party costs (estimated / at cost)	R _____
TOTAL ONCE-OFF AMOUNT	R _____
TOTAL MONTHLY AMOUNT	R _____ / month

Special inclusions / exclusions:

Owner acknowledgement: I confirm that I have selected the commercial model and features above and understand that unticked features are excluded unless added through written Change Request.
