

4DS NEXUS · TECHNICIAN APP

BOLOLO SECURITY

CCTV, alarm & access-control jobs

USER MANUAL — INSTALLATION TEAM

Your phone is the job card. Accept, drive, install, photograph, test, get sign-off. This guide is visual on purpose — so the workflow is obvious on site.

- OWNER
- CONTROL ROOM
- INSTALLATION
- CLIENT
- OFFICER

PREPARED FOR

Bololo Security

AUDIENCE

Technician / camera tech / install lead

DEVICE

Phone or tablet on site

PREPARED BY

4DS Solutions (Pty) Ltd

SIGN-IN

Technician · /tech/login

ISSUED

5 September 2026 · v1.1

DOC 4DS-BOLOLO-UM-INST-01 · CONTROLLED OPERATIONAL COPY · CONFIDENTIAL

Use the numbered sections in order the first time. After that, jump to the screen you need.

01	Your job vs the control room	03
02	Today's jobs	04
03	The eight statuses	05
04	On the road & on site	06
05	Checklist, cameras, photos	07
06	Sign-off & stock	08

If a client has a live panic while you are on site, phone Control Room. Do not 'resolve' it from the tech app.

YOU

- Fit cameras, NVR, alarm, access
- Name cameras for the operator
- Prove recording and remote view
- Get client sign-off

NOT YOU

- Dispatching armed response
- Sharing NVR passwords on WhatsApp
- Marking Complete to clear the board

CURRENT

CCTV — Berea residence
42 Musgrave Rd · Nomsa Client · 4× turret

ACCEPT JOB

- 1 Sign in on **Technician Team** — not Officer, not Client Portal.
- 2 Open Today's jobs → current card: address, customer, kit, time.
- 3 Search the list if you have several stops.

Move forward in order. Control Room and the owner can see this bar.

1 Accept	2 En route	3 Arrived	4 Site check	5 Install	6 Testing	7 Approval	8 Complete
-------------	---------------	--------------	-----------------	--------------	--------------	---------------	---------------

TRUTH

En route means you left

Office uses this like a tracker. Lying breaks dispatch trust.

STUCK

No access?

Photo the gate, note it, chat office.
Never Complete.

DONE

Complete is the last step

Only after testing, remote view, and client sign-off.

- 1 Job → Navigate (maps). Advance En route when you pull off, Arrived at the gate.
- 2 Walk the site. Confirm power, mounting, and that the van kit matches the job card.
- 3 Tick the checklist as you go — it is the proof pack.

Install checklist

01–02

Kit & access

Equipment on the van. Site access confirmed.

03–04

Mount & NVR

Cameras up. Recorder connected.

05–06

Network & cameras

LAN/Wi-Fi. Channels named for Control Room.

07–10

Test, demo, sign

Recording, remote view, client demo, sign-off.

NAMES

Front gate, not Cam3

Operators work at night. Labels must be human.

PHOTOS

Before, after, serials

Blurry shots lose arguments later.

CLOUD

Bololo Tuya / 4DS account

Never a personal installer login.

DEAD KIT

Mark defective

Do not leave silent duds on a wall.

REC Remote view is the finish line

If Control Room cannot see the site, the job is not done — even if the client smiled.

1 Demo	2 Sign-off	3 Complete	4 Follow-up job
-----------	---------------	---------------	--------------------

DO

- Request stock in Inventory
- Use team chat for delays
- Call Control Room for a live emergency

DON'T

- Strip another job's box quietly
- Screenshot customer Wi-Fi into a group
- Install a second unofficial app

Roster/parts: Bololo install lead. App faults: 4DS · quote "Bololo Security — Installation Team".

APP SUPPORT

4DS Solutions
