

BOLOLO SECURITY

Digital Security Management System

SOFTWARE DEVELOPMENT, IMPLEMENTATION & REVENUE-SHARE AGREEMENT

This Agreement sets out the terms under which 4DS Solutions will design, develop, configure and implement a digital security management system for Bololo Security, and the commercial terms of the agreed development fee and ongoing revenue share.

Prepared for:	Bololo Security
Document:	4DS-BOLOLO-SRA-2026-001 · v1.0 · 5 September 2026
Agreement date:	To be completed on signature
Client legal entity:	To be completed on signature
Client registration no.:	To be completed on signature
Commercial model:	R10,000.00 development fee + 10% monthly revenue share
Document status:	For signature · Confidential — Commercial

Commercial status: This Agreement becomes binding when signed by authorised representatives of both parties. The R10,000.00 development fee, payment schedule and 10% monthly revenue share form part of the contracted commercial terms.

Governing law: Republic of South Africa. This document should be reviewed by a South African attorney before execution where either party requires independent legal advice.

PARTY	DETAILS
Provider	4DS Solutions (Pty) Ltd, trading as 4 Dimensional Software Registration: K2025567725 · South Africa www.4dsnexus.co.za
Client	Bololo Security Legal name: To be completed on signature
Client registration	To be completed on signature
Client address	To be completed on signature
Effective date	To be completed on signature
Authorised representative	Name: _____ Position: _____

1.1 Appointment. Bololo Security appoints 4DS Solutions to design, develop, configure and implement the digital security management system described in this Agreement, and 4DS Solutions accepts that appointment subject to these terms.

1.2 Authority. The person signing for each party warrants that they are authorised to bind that party, or have obtained the necessary internal approval.

1.3 Definitions. In this Agreement, “**System**” means the specifically commissioned digital security management system/application for Bololo Security; “**Development Fee**” means the agreed amount of R10,000.00; and “**Revenue Share**” means the ongoing 10% share of applicable monthly client payments described in clause 4.

2.1 Purpose. This Agreement sets out the terms under which 4DS Solutions will design, develop, configure and implement a digital security management system/application for Bololo Security. The System is intended to provide a centralised platform for managing security operations, clients, security services and related activities.

2.2 Nature of the System. The System is a technology management and communication tool. It does not replace trained security personnel, emergency services or appropriate security procedures.

03 • Project Scope

3.1 Initial system. The initial System may include:

AREA	INCLUDED FUNCTIONALITY (AS AGREED)
Client & property	Client management; client/property profiles; property information
Operations	Security service management; site management; patrol/security activity records; operational status tracking
Personnel	Security officers and personnel management; staff/officer management; user accounts; role-based access
Incidents & alerts	Incident reporting; alerts; notifications; system activity records and reporting
Administration	Administrative and management dashboards
Client / mobile (where agreed)	Security information; emergency/panic functionality; notifications; incident reporting; communication; property information; account information

3.2 Future functionality. Future functionality such as CCTV, GPS/fleet tracking, officer applications, supervisor/control-room functions, patrols, payment integrations, advanced reporting, AI and third-party integrations may be added by separate agreement or quotation. Such items are not included merely because they are listed as possible future work.

4.1 Development fee. The total initial development and implementation fee is **R10,000.00**.

4.2 Commercial value. The parties acknowledge that the development, design, configuration, implementation and associated functionality comprising the agreed security management system represents a standard commercial development value of **R115,000.00**.

4.3 Growing-company discount. 4DS Solutions has agreed to provide Bololo Security with the System at a substantially reduced introductory price because Bololo Security is a growing company and 4DS Solutions wishes to support its growth by making the technology more accessible at an early stage of the Company's development.

4.4 Discount amount. This special arrangement reduces the standard commercial value from R115,000.00 to an agreed development price of R10,000.00, representing a discount of **R105,000.00** (approximately 91.3%).

COMMERCIAL ITEM	AMOUNT
Standard commercial development value	R115,000.00
Special growth / introductory discount	– R105,000.00
Agreed development price	R10,000.00

4.5 No precedent price. The R10,000.00 price is a special strategic/introductory commercial arrangement for Bololo Security and does not establish R10,000.00 as the standard or future price for equivalent systems, additional modules, integrations, support services or future projects. Similar systems supplied to other security companies or third parties may be quoted at 4DS Solutions' prevailing commercial rates, which may be substantially higher.

4.6 Discount does not waive rights. The discount does not waive 4DS Solutions' intellectual-property rights, development methodologies, reusable software components, frameworks or commercial pricing structure.

4.7 Payment schedule. The Development Fee is payable as follows:

MILESTONE	WHEN DUE	AMOUNT
Deposit	Upon acceptance / signing of this Agreement	R3,000.00
Final payment	Upon substantial completion and before final handover or production launch	R7,000.00
Total Development Fee		R10,000.00

05 · Recurring Revenue Share

5.1 Revenue share. In addition to the once-off Development Fee, Bololo Security agrees to pay 4DS Solutions a recurring revenue share equal to **10%** of monthly client payments processed through, attributable to, or generated in connection with the System/application.

5.2 Separate and continuing. The 10% revenue share is separate from the R10,000.00 Development Fee and does not expire merely because the Development Fee has been fully paid.

5.3 Worked example. If 100 clients each pay R500 per month, total monthly client revenue is R50,000 and the 4DS revenue share is R5,000.

EXAMPLE	CALCULATION
Clients using the System	100
Monthly fee per client	R500.00
Total monthly client payments	R50,000.00
4DS revenue share (10%)	R5,000.00

The example is illustrative only. The actual amount payable is 10% of applicable monthly client payments as defined in this Agreement.

6.1 Reporting. Bololo Security shall provide accurate information regarding active clients using the System and monthly payments received from such clients.

6.2 System records. Where payment functionality is integrated, system records may be used to calculate the revenue share.

6.3 Off-system payments. Payments received outside the System but relating to clients using the application must be accurately reported.

6.4 Due date. The revenue share is payable within **7 calendar days** after each calendar month unless otherwise agreed in writing.

6.5 Verification. 4DS Solutions may reasonably request supporting information to verify calculations.

07 · Third-Party Services

7.1 Separate charges. Payment gateways, SMS providers, WhatsApp services, mapping services, hosting/cloud providers, notification services and other third-party platforms may charge separate fees.

7.2 Not included in revenue share. Such fees are not included in the 10% revenue share unless expressly agreed in writing and remain the responsibility of Bololo Security unless included in a separate quotation.

THIRD-PARTY COST	TREATMENT
Payment gateways	Client-paid unless separately quoted
SMS / WhatsApp / notifications	Client-paid unless separately quoted
Mapping / location services	Client-paid unless separately quoted
Hosting / cloud / domain / database / APIs	Charged separately unless expressly included

8.1 Reasonable efforts. 4DS Solutions will use commercially reasonable efforts to develop and implement the agreed System. The process may include requirements confirmation, database/system setup, UI development, core functionality, access/security configuration, testing, bug fixing, deployment and handover.

8.2 Timelines. Timelines may vary depending on requirements, feedback, third-party integrations and information supplied by Bololo Security.

8.3 Client responsibilities. Bololo Security will:

NO.	RESPONSIBILITY
8.3.1	Provide accurate business information, branding and content
8.3.2	Provide timely feedback and approvals
8.3.3	Ensure information supplied may lawfully be used
8.3.4	Manage authorised System access
8.3.5	Pay amounts due
8.3.6	Accurately report monthly revenue
8.3.7	Comply with applicable laws and regulations governing its security operations

8.4 Defects. 4DS Solutions will correct genuine technical defects in originally agreed functionality during the initial implementation period at no additional development charge. A defect is functionality that does not operate substantially according to the agreed specification.

8.5 Not defects. New features, business-rule changes, redesigns, integrations or additional modules are not defects and may be quoted separately. Verbal requests do not automatically constitute an agreement to provide additional work free of charge.

9.1 Ongoing support. Ongoing support, maintenance, hosting, monitoring, upgrades and additional development may be provided under a separate monthly support agreement or quotation. The 10% revenue share does not automatically include unlimited custom development.

9.2 Hosting. Hosting and infrastructure may use third-party providers. Hosting, domain, database, SMS, API and other infrastructure costs may be charged separately unless expressly included.

9.3 Third-party outages. 4DS Solutions is not responsible for outages caused by third-party infrastructure, payment gateways, networks or external services outside its reasonable control.

9.4 Availability. 4DS Solutions will make reasonable efforts to maintain System availability. Temporary interruptions may occur due to maintenance, upgrades, infrastructure failures, cyber incidents, third-party outages or circumstances outside reasonable control.

10 • Ownership & Intellectual Property

10.1 Licence to use. Upon receipt of the full R10,000.00 Development Fee, Bololo Security will have the right to use the specifically commissioned System for its business operations.

10.2 4DS retained rights. 4DS Solutions retains ownership of its pre-existing code, frameworks, reusable components, templates, methodologies, generic architecture, internal tools and reusable development processes unless otherwise agreed in writing.

10.3 No resale of framework. Bololo Security may not resell or commercially license the underlying 4DS framework to third parties without written permission.

10.4 Revenue-share rights. The parties acknowledge that the 10% monthly revenue share is a separate ongoing commercial component of the arrangement. Payment of the R10,000.00 Development Fee does not terminate or buy out the 10% revenue-share arrangement. The revenue share continues while Bololo Security provides paid services to clients through, by means of, or using the System/application, unless the parties agree otherwise in writing.

10.5 Non-circumvention. Bololo Security shall not deliberately restructure, redirect or manipulate client payments for the primary purpose of avoiding the agreed 10% revenue share where those clients continue to use the System/application. The parties agree to act in good faith and maintain accurate records.

11.1 Confidentiality. Both parties shall keep confidential business, client, pricing, technical, security and financial information confidential, except where disclosure is authorised, necessary for legitimate business purposes or required by law.

11.2 Data protection. The parties shall take reasonable steps to protect personal and business information. Bololo Security remains responsible for ensuring it has lawful authority to collect and process customer information. Where applicable, the parties shall comply with South African privacy requirements, including POPIA.

11.3 Security measures. 4DS Solutions will implement reasonable technical measures appropriate to the agreed architecture, but no internet-connected system can be guaranteed completely immune from cyberattacks or security incidents.

11.4 Access control. The System may include role-based access controls. Bololo Security is responsible for protecting administrator credentials, removing former users, maintaining appropriate permissions, not sharing credentials and reporting suspected unauthorised access.

11.5 Restriction of access. 4DS Solutions may restrict access where reasonably necessary to protect the System from misuse, security threats or non-payment.

12 · Late Payment, Termination & Liability

12.1 Late payment. If amounts remain unpaid, 4DS Solutions may provide written notice requiring payment and may temporarily suspend relevant services, System access or support if the matter is not resolved within a reasonable period. Suspension does not remove amounts already owed.

12.2 Termination. Either party may request termination by written notice. Termination does not remove accrued payment obligations. Outstanding development fees and revenue-share payments remain payable. The treatment of the System and revenue-share arrangement following discontinuation shall be agreed in writing.

12.3 Limitation of liability. 4DS Solutions shall not be liable for indirect, consequential or unforeseeable losses arising from use of the System, including losses caused by third-party outages, payment gateway failures, internet/mobile failures, device failures, incorrect information, unauthorised account use, cyber incidents outside reasonable control, misuse of the System, or failure of security personnel to respond appropriately.

13.1 Changes to scope. Functionality outside the original agreed scope may be treated as a change request and quoted separately. Verbal requests do not automatically constitute an agreement to provide additional work free of charge.

13.2 Entire agreement. This Agreement represents the understanding between the parties concerning the initial development, implementation and revenue-share arrangement. Material changes should be recorded in writing and accepted by both parties.

13.3 Governing law. This Agreement is governed by the laws of the Republic of South Africa.

13.4 Acceptance. By signing below, both parties confirm that they have read and understood this Agreement; agree to the R10,000.00 discounted development fee; agree to the R3,000.00 deposit and R7,000.00 final payment; agree to the ongoing 10% monthly revenue share; and understand that additional development outside the agreed scope may incur additional charges.

Commercial summary

ITEM	AMOUNT / TERM
Commercial value	R115,000.00
Special growth discount	– R105,000.00
Agreed development price	R10,000.00
Deposit (on signing)	R3,000.00
Final payment (before handover / launch)	R7,000.00
Ongoing revenue share	10% of applicable monthly client payments

The Development Fee and the Revenue Share are separate. Payment of the Development Fee does not terminate the Revenue Share.

By signing below, the parties confirm that they have read and understood this Agreement and agree to be bound by its terms, including the R10,000.00 development fee, the payment schedule, and the ongoing 10% monthly revenue share.
