

4DS NEXUS · PROTECTED SUBSCRIBER

BOLOLO SECURITY

Panic, home, family & vehicles

USER MANUAL — CLIENT

This is your household link to Bololo’s control room. The big red control is for danger. Everything else is status, family, and the home alarm. Keep the login to yourself.

ISSUED

5 September 2026 · v1.1

DOC 4DS-BOLOLO-UM-CLT-01 · CONTROLLED OPERATIONAL COPY · CONFIDENTIAL

Use the numbered sections in order the first time. After that, jump to the screen you need.

01	What this app is	03
02	Sign in & home screen	04
03	Panic, medical & fire	05
04	Home, family, vehicles	06
05	Chat & medical profile	07
06	If the app fails	08

Family members should have their own access where Bololo has set it up.

USE IT TO

- Hold Panic / Medical / Fire
- Arm or disarm a linked alarm
- See family GPS and chat
- Lock a linked vehicle

DO NOT

- Test Panic for fun
- Share the password
- Wait on chat if you are in danger

The app does not replace police, ambulance, fire, or a guard at the gate.

- 1 Open the **Client Portal** link Bololo sent — not Officer, not Control Panel.
- 2 Organisation (if asked), email, password.
- 3 You should see your name and **Protected / Attention / Alert**.

GREEN

Protected

Systems look healthy. Still keep Panic for real emergencies.

AMBER

Attention

Something needs a look — not always a house fire.

RED

Alert

Critical. Open Review / wait for Control Room.

Tiles: Home security, Today counts, Live tracking, Family, Alerts, Safe zones. Bottom bar + chat button stay with you.

2s Hold — a tap does nothing

Keep holding the large Panic control for two seconds.
Accidental send: use Undo if it appears, and call Bololo if a unit is already rolling.

- 1** Protect / Emergency hub, or Panic on home.
- 2** Hold Panic, Silent, Medical or Fire as labelled.
- 3** Keep the phone on. Answer Control Room unless it is unsafe.
- 4** Share live location if the app asks and you have moved.

Silent: when a loud call could put you at risk. Do not then shout on speaker in the same room.

HOME

Away · Stay · Night · Disarm

Some modes need a hold. Siren / home panic: only if you mean it — neighbours will hear.

CCTV

Your cameras

Live views where your plan includes them. Control Room sees events too.

FAMILY

Chat + GPS

WhatsApp-style family chat, live location, in-app call where enabled.

PLACES

Safe zones

Home, school, work. Ask Bololo to add a zone.

CAR

Lock / Unlock

Remote pad on the vehicle card if fitted.

THEFT

Phone tracking

Start only for real follow / recovery. Stop when you are safe.

CHAT**Control Room**

Gate codes, alarm faults, 'I'm home'. Not for a knife in the kitchen — use Panic.

ALERTS**Incidents & updates**

Open from the red/amber strip on home.

MEDICAL**Your file**

Blood, allergies, meds, doctor. Used if Medical emergency is held.

BILLING**Plan & receipts**

Office / PayFast. Never during an active panic.

FAMILY**Own logins**

Do not share the account holder password. Ask Bololo to add a family login.

DOCUMENTS**Receipts & letters**

Billing documents from the portal. Keep them for your records.

WRONG DOOR

Not Officer / Control Panel

Those logins will bounce you. Use Client Portal only.

PASSWORD

Ask Bololo

Control room / office reset. Do not invent a second email.

PANIC DEAD

Phone anyway

Bololo emergency number, then 10111 / 112 if needed. Do not wait on a spinner.

GREY MAP

Still hold Panic

Map pictures need internet. Help does not.

Bololo Security is your response company. 4DS built the platform. Life-threatening: also call South African emergency services.

APP SUPPORT

4DS Solutions

www.4dsnexus.co.za · quote "Bololo Security — Client Portal"

OPERATIONS

Bololo Security

Radio and supervisor for SOP. 4DS Solutions only for platform faults.
