

4DS NEXUS · FIELD OFFICER APP

BOLOLO SECURITY

Jobs, navigation, evidence & SOS

USER MANUAL — OFFICER

GPS on. Status honest. SOS only when you need backup. This is the field phone: Accept, En route, On scene, photos to dispatch, then a real report — not a WhatsApp novel.

- OWNER
- CONTROL ROOM
- INSTALLATION
- CLIENT
- OFFICER

PREPARED FOR

Bololo Security

AUDIENCE

Armed response / field officer

DEVICE

Phone with GPS and data

PREPARED BY

4DS Solutions (Pty) Ltd

SIGN-IN

Officer App · /officer/login

ISSUED

5 September 2026 · v1.1

DOC 4DS-BOLOLO-UM-OFF-01 · CONTROLLED OPERATIONAL COPY · CONFIDENTIAL

Use the numbered sections in order the first time. After that, jump to the screen you need.

01	On duty	03
02	Sign in & Field Home	04
03	Accept → On scene	05
04	Map, evidence, reports	06
05	Chat, calls, SOS	07
06	End of job & faults	08

This app does not replace radio SOP. Keep GPS on the whole shift.

YOU

- Update status as it happens
- Navigate, arrive, protect, report
- Send photos to dispatch
- Hold SOS if you are in danger

NOT YOU

- Accept a new panic while still on another job without telling the desk
- Scene photos on social media
- SOS as a joke

- 1 Open **Officer** login — not Technician, not Client Portal.
- 2 Allow location when asked. No GPS, no useful pin.
- 3 Field Home: your name, current job, jobs / urgent / messages.
- 4 Red emergency banner = that job is already yours. Open it.

GPS On duty means location on

If you deny GPS, Control Room cannot see you and may send someone else across town.

1 Accept	2 En route	3 Navigate	4 On scene	5 Report	6 Complete
-------------	---------------	---------------	---------------	-------------	---------------

ACCEPT

The job is yours

Read PANIC vs INTRUSION, name, address first.

EN ROUTE

You have left

Tap when the wheels roll — the log is the record.

ON SCENE

You are there

Not 'almost'. Physical arrival.

Update even if you already said it on radio. Paperwork and the app should match.

MAP

Your pin + jobs

Use Open in Google Maps for turn-by-turn. Set it before you drive.

EVIDENCE

Photo / video

Plates, damage, scene as SOP allows. GPS stamps the file.

REPORT

Facts only

Time on scene, what you found, who you spoke to, outcome.

SECOND PROBLEM

New field incident

Do not bury a new crime in chat on the old ticket.

CHAT

Short updates

"En route 3 min." "On scene, resident home, false alarm."

CALLS

Desk / client / crew

Silent panic: follow SOP before calling the house.

SOS

Hold on Field Home

Alerts Control Room and supervisor. Then cover + radio.

SOS Only when you need backup

If you fire it by mistake, say so on radio immediately. Do not ghost.

1 On scene done	2 Report in	3 Desk closes	4 Next job
EMPTY QUEUE Ask the desk Confirm you are on the roster and GPS is on.		MAP SPIN Still update status Use Google Maps from the address on the card.	
CRASH Reopen + radio Do not go dark.		WRONG STREET Stop and confirm Do not guess a suburb.	

Command: Bololo Control Room. App faults: supervisor / 4DS · quote "Bololo Security — Officer App".

APP SUPPORT

4DS Solutions

www.4dsnexus.co.za · quote "Bololo Security — Officer App"

OPERATIONS

Bololo Security

Radio and supervisor for SOP. 4DS Solutions only for platform faults.
